Journal of Testing and Evaluation
Table of Contents, Volume 21
1993

No. 1, January

Monitoring Fatigue Crack Propagation in Compact Tension Specimens via Remote Sensing of Back Face Strain—K. R. Y. SIMHA, H. S. S. HANDE, AND P. R. ARORA 3

Calculation for Rolling Contact Fatigue Life and Strength of Case-Hardened Gear Materials by Computer—JIANG BINGYUAN, ZHENG XITONG, AND WANG MINGLI 9

Up-and-Down Methodology Applied to Statistically Planned Experiments—R. E. LITTLE AND J. J. THOMAS 14

Contoured Wood Double Cantilever Beam Specimen for Adhesive Joint Fracture Tests—BRYAN H. RIVER AND E. ARNOLD OKKONEN 21

Time-Domain Ultrasonic NDE of the Wave Velocity of a Sub-Half-Wavelength Elastic Layer—VIKRAM K. KINRA AND CHANGYI ZHU 29

Testing the Superplastic Flow Characteristics of Advanced Aluminum Alloys—RAMON E. GOFORTH AND MALUR N. SRINIVASAN 36

The ASCOR Test: A Simple Automated Method for Stress Corrosion Testing of Aluminum Alloys—L. SCHRA AND F. F. GROEP 44

Quality Assessment Tests for Nails—Y. J. CHIANG AND M. H. CHU 51

Use of a Proposed Test Procedure for Quantifying the Triboelectric Charging Propensity of Packaging Films—C. WILLIAM HALL, S. PAUL SINGH, AND GARY BURGESS 57

More Rapid Edgewise Crush Test Methods—THOMAS J. URBANIK, ARTHUR H. CATLIN, DAVIDE R. FRIEDMAN, AND RICHARD C. LUND 62

Performance of Hybrid Reinforcements in PVC Composites: Part I—Use of Surface-Modified Mica and Wood Pulp as Reinforcements—DEBESH MALDAS AND BOHUSLAV V. KOKTA 68

The Effect of Moisture on Laboratory-Prepared Asphalt Mixtures—WADDAH AKILI 73

The Effect of Wet Abrasive Wear on the Tensile Properties of Cotton and Polyester-Cotton Fabrics—JOSHUA OSAYANDE UKPONMWAN 84

TECHNICAL NOTE

Asbestos-Free Gasket Materials for Turbines—WILLIAM F. JONES AND BRIJ B. SETH 94

No. 2, March

Fatigue and Corrosion Fatigue of Beryllium-Copper Spring Materials—R. BAGHERI AND G. A. MILLER 101

Minimization and Quantification of Error Associated with the *K* Gradient and the Interval of Crack Length Measurement in Fatigue Crack Growth Testing—MORDECAI OORE 107

Flow and Stability Limits for Six-Inch-Diameter Marshall Specimens—CRAIG M. NEWTSON, JOHN P. TURNER, AND RICHARD J. SCHMIDT 114

Future of Water Treatment—PAUL R. PUCKORIUS 118

Sensitivity of Water Leak Tests for Latex Condoms—BRUCE A. HERMAN, RONALD F. CAREY, AND JEAN E. RINALDI 124

Effect of Internal Gas Pressure on the Compression Strength of Beverage Cans and Plastic Bottles—S. PAUL SINGH AND GARY BURGESS 129

Outliers in Interlaboratory Testing—JOHN MANDEL 132

Discussion on "Characterization of Early and Modern Wire for an Italian Harpsichord" by J. H. Underwood et al.—MARTHA GOODWAY 136

Closure—JOHN H. UNDERWOOD, WALTER BURR, A. ANTHONY KAPUSTA, AND CHRISTOPHER A. RICKARD 137

No. 3, May

Introduction of a New Dynamic Fracture Toughness Evaluation System—TOSHIRO KOBAYASHI, ISAMU YAMAMOTO, AND MITSUO NIINOMI 145

The Design of a Control System for a Superimposed Frequency Fatigue Test Machine—DAVID P. STOTEN AND DAVID J. SMITH 154

Axial-Torsional Fatigue: A Study of Tubular Specimen Thickness Effects—PETER J. BONACUSE AND SREERAMESH KALLURI 160

The Gel Electrode Revisited: Fatigue Crack Detection with a Polymer Film—WILLIAM J. BAXTER 168
Novel Stage for Ultrasonic Measurement of Real Contact Area Between Rough and Flat Parts Under Quasi-Static Load—ANDRZEI POLIJANIUK AND JAN KACZMAREK 174
Evaluation of Static and Dynamic Contact Stresses in Simulated Granular Particles Using Stress Gages—Y. XU AND A. SHUKLA 178
The Vibration-Flex Test Method to Determine the Susceptibility of Plastic Films to Pinhole Formation Due to Flexing—J. V. VARUGHESE AND S. W. GYESZLY 188
Analysis of Marshall Test Behavior with Triaxial Test Determined Material Properties—BOON-HWEE LOW, SIEW-ANN TAN, AND TIEN-FANG FWA 192
Infrared Technique as a Research Tool for Measuring Water Vapor Transmission of Roofing Membranes—O. DUTT, C. LAVALLÉE, AND H. E. ASHTON 199
Effects of Wash Temperature on Bacterial Survival and Strength Retention of Cotton Fabrics—THERESA A. PERENICH AND MARY ANN MOORE 211

No. 4, July

Fatigue Crack Initiation in Nonferrous Materials: A Model Assessment—HAMID R. AZIMI AND GARY A. MILLER 221
J and CTOD Estimating Equations for Shallow Cracks in Single Edge Notch Bend Specimens—MARK T. KIRK AND ROBERT H. DODDS, JR. 228
Initiation and Stable Crack Growth Behavior of API X70 Steel at Low Temperatures (25°C ≥ T ≥ −95°C)—D. P. ROMILLY 239
Slice Synthesis Technique for an Embedded Crack in Residual Stress Fields—TOSHIHIKO NISHIMURA 256
Optimization of Test Parameters for Quantitative Stress Measurements Using the Miniaturized Disk-Bend Test—D. E. MEYERS, F. C. CHEN, J. ZHANG, AND A. J. ARDELL 263
Determining Paint Adhesion to Wood Using a Uniform Double-Cantilever Beam Technique—MARK KNAEBE AND R. SAM WILLIAMS 272
A Novel Method for Imaging the Damage Pattern in Laminated Plastic Materials Subjected to Ballistic Impact—K. SIVAKUMAR, Y. V. RAMAKRISHNA, K. RAMANJANEYULU, AND T. BALAKRISHNA BHAT 280
Resonance Monitoring of Building Assemblies for Durability Tests—GEORGE HEARN AND RENE B. TESTA 285
Density Measurement of Cylindrical Specimens Within a Mold by Gamma-Rays—TAN SIEW-ANN AND FWA TIEN-FANG 296
An Improved Moisture Permeability Measurement Method—JAMES S. DOUGLAS, THOMAS H. KUEHN, AND JAMES W. RAMSEY 302
A Cutting Apparatus to Aid in the Preparation of Ring Specimens for Tensile Testing of Latex Condoms and Other Thin Elastic Films—T. PATRICK LENNON AND VORAYA SRISAMANG 309
Compressibility Analysis of Wet Abraded Woven Fabrics—JOSHUA OSAYANDE UKPONMWAN 312
TECHNICAL NOTE
Accurate and Precise Fabrication of Iosipescu Shear Test Specimens—DONALD M. BLACKKETTER AND EDWIN M. ODOM 322

No. 5, September

Embrittlement of an AISI 8640 Lower Bainite Steel—JAMES V. RINNOVATORE, KARL F. LUKENS, JAMES REINHOLD, AND WILLIAM MAHON 329
A Detection Method of Fatigue Crack Initiation by Analyzing Strain Waveform—CHOBIN MAKABE, SHIN-ICHI NISHIDA, AND HIDEO KANESHIRO 339
Influence of Substrate Deformations on the Thermal Fatigue Life of SMT Solder Joints—JACOB B. ZAFRAN AND BELA I. SANDOR 346
An Advanced Control Concept and Algorithm for Long-Term Data Acquisition in High-Temperature Fracture Mechanics Tests—HUIMIN LIU AND BILAL DOGAN 351
Some Microstructural Conditions for Evaluating Fracture Toughness and *R*-Curve Behavior in Platelet-Reinforced Composites—GIUSEPPE PEZZOTTI, KOICHI NIIHARA, AND TOSHIHIKO NISHIDA 358
Mean Stress Diagrams for Composites Generated Using a Modified Up-and-Down Test Methodology: Part I—Extensive Preliminary Data—R. E. LITTLE 366
Mean Stress Diagrams for Composites Generated Using a Modified Up-and-Down Test Methodology: Part II—Limited Preliminary Data—R. E. LITTLE 373
Characterization of Defects in Graphite Fiber Based Composite Structures Using the Acoustic Impact Technique (AIT)—P. K. RAJU, J. R. PATEL, AND U. K. VAIDYA 377
Metallized Microballoon Filled Composite EMI Shielding Materials—DONALD W. RADFORD AND BOYLE C. CHENG 396
Lifetime Predictions of uPVC Pipes from Short-Time Tests—RAGNAR SELDÉN AND PER A. GRADIN 402
A Mechanical Extensometer for High-Temperature Tensile Testing of Ceramics—K. C. LIU AND J. L. DING 406

Compaction of Asphalt Mixtures for Laboratory Testing: Evaluation Based on Density Profile—T. F. FWA, B. H. LOW, AND S. A. TAN 414
Analysis of Jet Fuel Thermal Oxidation Deposits by Spectral Fluorometric Technique—JOHN L. BRICE 422
Characterization of Hypervelocity Impact Debris: Naval Research Laboratory Tests—BRYAN H. FORTSON AND JAMES E. WINTER 438
A Fiber Optic Chemical Sensor for Measurement of Groundwater pH—M. H. MAHER AND M. R. SHAHRIARI 448
Static Structural Integrity Monitoring System—Y. L. MO 453

No. 6, November

Maximum-Load Predictions in the Dugdale Model Using a Critical CTOA Criterion—INHOY GU 461
An Assessment of the Piezoelectric Ultrasonic Composite Oscillator Technique (PUCOT) for Measuring the Elastic and Technical Constants of Solids—A. WOLFENDEN AND M. R. HARMOUCHE 470
Enhancing Thermal Hazard Awareness with Compatibility Charts—DAVID M. GAY AND DAVID J. LEGGETT 477
Laboratory Testing Procedure for Evaluation of Moving Bed Catalyst Attrition—PATRICIA K. DOOLIN, DIANNE M. GAINER, AND JAMES F. HOFFMAN 481
Dynamic Testing of the Strength of Helmet Chin Straps—ADAM GILCHRIST AND NIGEL J. MILLS 488
Techniques for the Determination of the Static and Dynamic Internal Friction Coefficients of Ceramic Powder—MIGUEL A. MARTÍNEZ, RAÚL CORTÉS, VICENTE SÁNCHEZ-GÁLVEZ, AND CARLOS NAVARRO 494
Formulation and Application Technologies for Microbial Pesticides: Review of Progress and Future Trends—ROBERT J. CIBULSKY, BALA N. DEVISETTY, GARY L. MELCHIOR, AND BRIAN E. MELIN 500
WORKSHOP ON ACCURACY OF LOAD AND STRAIN MEASUREMENT OF TESTING MACHINES
Introduction—A. PERLOV 504
What's New in Traceability—ERNEST L. GARNER AND STANLEY D. RASBERRY 505
Automated Data Acquisition and Load and Strain Measurement Resolution—FRED L. LEHMAN 510
Calibration Techniques for Extensometry: Possible Standards of Strain Measurement—ROBERT B. WATSON 515
The Use of Robotics to Eliminate Testing Variability in the Evaluation of Polymeric Matrix Composites Subjected to Three-Point Flexure—ROBERT B. CROMAN AND DANIEL W. JEFFERIS 522
Pressure and Flexible Membrane Effects on Direct-Contact Extensometer Measurements in Axisymmetric Compression Tests—KIRBY D. MELLEGARD, TOM W. PFEIFLE, ARLO F. FOSSUM, AND PAUL E. SENSENY 530
